RHEUMATIC FEVER TRACED TO TEETH

Scientist Tells of Tests Made on Animals.

Philadelphia.—Jefferson Medical college has just completed experiments tending to prove definitely that rheumatic fever is the direct results of focal infections, such as infected teeth and tonsils.

This was achieved by managing for the first time to produce satisfactory infections artificially in animals and studying the immediate and subsequent results.

Dr. Virgil Holland Moon of the college laboratory announced the results and explained the method. All these experiments at clinical sessions in the amphitheater of Jefferson hospital, arranged by and for excinterns of the institution.

He said that previous efforts at artificially inducing chronic focal infections in experimental animals had failed because the viruses used had been introduced under the skin by injection.

And the big, family size, 100 tablet bottles have again been reduced in price. These new low prices are now in effect throughout the United States.

So—Always say "Bayer"! When You Buy

And remember, when you ask for Bayer Aspirin at these new low prices it's unnecessary now to accept any other preparation in its place.

So—never ask for it by the name "aspirin" alone when you buy, but always say B-A-Y-E-R Aspirin and see that you get it.

Remember, too, that doctors advise it, for it DOES NOT HARM THE HEART. And that scientists rate it among the fastest known safe reliefs for pain. (See illustration below.)

Why Bayer Aspirin Works So Fast
